Personal season handicap from General Handicap races but adjusted based on the results of previous races in the series. In the first race it takes part in, each boat gets its season handicap. In the next race, the handicap (PN_2) is calculated as 75% of its previous handicap and 25% of the personal handicap (BCR/1.08) it sailed the first race to. In the next race, the handicap (PN_3) is calculated as 80% of its previous handicap (PN_2) and 20% of the personal handicap (BCR/1.08) it sailed the previous race to. So in effect the handicap of each sailor is adjusted according to how well they have done in earlier races.
